

Visit Form Streamlining Specs

Eliminating clinical redundancies, adding overarching practitioner reviews, and implementing modal detail popups inside the Follow-up Context Table.

Redundancy Streamlining Summary

To save clinical time and eliminate screen clutter, we are removing redundant fields from Step 5 ("Clinical notes/Evaluation") of the comprehensive visit wizard. All data is carried forward contextually.

CURRENT REDUNDANT FORM

Initial Complaints Textbox (New Consult)

Redundant because clinicians already typed the "Main complaint" on the very first step of the form.

Symptoms of Previous Consult (Follow-up)

Redundant because all open symptoms are automatically carried forward as active, editable items in Step 2.

Evaluation on Previous Complaint (Follow-up)

Redundant textbox forcing doctors to type a summary that is already captured by structured symptoms and rating sliders.

PROPOSED STREAMLINED FORM

1. Form Field Removal

We completely remove all three generic text areas. This saves doctors up to 30 clicks and typing effort per visit.

2. Auto-Compilation Engine

The system automatically compiles structured symptom progress (notes, resolved status) and slider ratings (Energy, Sleep) upon submission.

3. Overarching Clinician Note

We add a single compact **"Practitioner Evaluation Note"** on the evaluation step, so doctors can write a final custom overview (appended to the summary).

🎥 Live Spec Sandbox (Interactive Demo)

This sandbox represents the redesigned **Follow-up Context Table**. To prevent rows from becoming tall and unreadable due to longer prescription lists or compiled summaries, the data is tucked into **modal popups**. Try clicking them below:

REDESIGNED HISTORY TABLE

DATE	REMEDY & INSTRUCTIONS	EVALUATION & PROGRESS SUMMARY
03 June 2026	Pulsatilla 30C (See Appendix / Summary)	View Progress Summary (See Appendix / Summary)
20 May 2026	Nux Vomica 200C (See Appendix / Summary)	View Progress Summary (See Appendix / Summary)

 Remedy Details

SELECTED REMEDY

Pulsatilla 30C

INSTRUCTIONS / FREQUENCY

3 pellets dry, twice daily. Take first thing in the morning on an empty stomach.

REASON FOR REMEDY

Prescribed to address the yellow catarrh, sinus congestion, and changeable emotional states.

 Evaluation Progress Summary

SYMPTOM OUTCOMES (STEP 2)

- ✓ Yellow Catarrh: Resolved
- ✓ Head Congestion: Resolved
- ⚡ Mood Fluctuations: Open

Catarrh resolved within 48 hours. Mood transitions are less intense but still present in evenings.

VITALS & ENERGY SLIDERS (STEP 5)

Energy Rating: 8/10 (Improved dramatically)
Sleep Rating: 7/10 (Fewer waking spells)

CLINICIAN EVALUATION OVERVIEW

Patient responded exceptionally well. The physical acute symptoms have fully cleared. Energy levels are much higher. We will now shift focus to stabilizing the sleep cycles.

 Remedy Details

SELECTED REMEDY

Nux Vomica 200C

INSTRUCTIONS / FREQUENCY

Take 1 dose (3 pellets) dry at bedtime, for three nights only.

REASON FOR REMEDY

Prescribed to address persistent work-related insomnia, gastrointestinal cramps, and irritability.

 Evaluation Progress Summary

SYMPTOM OUTCOMES (STEP 2)

✓ **GI Cramping: Resolved**

⚡ **Late Bedtime Insomnia: Open**

Spasmodic cramps fully resolved. Insomnia remains an issue on heavy workdays.

VITALS & ENERGY SLIDERS (STEP 5)

Energy Rating: 6/10 (Moderately rested)

Sleep Rating: 5/10 (Difficulty falling asleep)

CLINICIAN EVALUATION OVERVIEW

Digestive symptoms cleared. Irritability has significantly lessened. Sleep latency is still long on weeknights. Recommended dietary changes (no caffeine after 2pm) and will reinforce with sleep hygiene.
